WORKING EXPERIENCE

Company Name : **V Sporting Tech (Freelance Project)**
Position : Front-end Developer
Duration : 16th April 2025 to Present
Skills used : Vuejs, HTML, CSS, SASS, Javascript, AJAX, Nodejs, Express js
Job Description :

- Maintaining and upgrading website by using HTML, CSS with SASS and Javascript, Vuejs, Expressjs and Nodejs. Also, add new function for the existing website frontend and collaborating with cross-functional teams to integrate RESTful APIs and ensure seamless data exchange between the client-side and server-side components. I am responsible for refactoring legacy code to improve application performance and maintainability, while implementing responsive design principles to ensure a high-quality user experience across various devices and screen sizes. Additionally, I conduct thorough testing and debugging of new features, optimize website loading speeds through efficient asset management, and provide technical support to resolve complex frontend issues within strict deadlines. My role also involves participating in regular code reviews and utilizing version control systems to maintain a clean and scalable codebase for the long-term evolution of the platform..

Company Name : **BJAK Sdn Bhd**
